

Jeavio

TRANSFORMING ENTERPRISE
KNOWLEDGE INTO A
STRATEGIC ADVANTAGE

In fast-moving organizations, knowledge is often the first thing to slip through the cracks.

Decisions get buried in meetings and emails. Insights hide in documents spread across systems. As teams scale or shift, context is lost — and with it, time, alignment, and momentum.

For high-growth enterprises, this knowledge fragmentation creates avoidable risks:

- Longer onboarding cycles
- Leadership transitions without continuity
- Missed insights that could accelerate outcomes

ADAPT is built to change this.

ADAPT is the foundational platform we use across our core service offerings to uncover customer insights, accelerate discovery, and retain institutional knowledge

Adapt turns every meeting, document & conversation into a **durable knowledge asset.**

By ingesting working materials — meeting recordings, transcripts, documents — ADAPT helps us build a living knowledge base for every engagement. It organizes information by project, tracks key decisions and approvals, and surfaces insights when they're most needed.

Our teams use ADAPT across all core services to capture the unstructured knowledge that lives in stakeholder conversations, legacy documents, and fragmented systems—transforming it into structured insight and actionable recommendations.

From Fragmentation to Institutional Memory

Most tools simply help teams find information. **Adapt goes further.**

Jeavio uses ADAPT throughout our client engagements to transform what we learn—stakeholder interviews, architecture reviews, process walkthroughs—into structured, queryable intelligence that informs our work and recommendations.

Result: Teams execute with clarity. Leaders make faster, more informed decisions.

Beyond Search: Actionable Knowledge in Real Time

Secure collaboration, **without compromise.**

Jeavio engagements often involve internal and external stakeholders—vendors, advisors, clients—each requiring context, visibility, and accountability.

Through ADAPT, our team enables secure, role-based access to curated project knowledge, ensuring the right information reaches the right people.

Across even the most complex ecosystems, ADAPT helps our consultants manage collaboration with consistency, transparency, and control—without compromising sensitive data.

No matter how complex your ecosystem becomes, Adapt keeps collaboration secure and accountable.

Tangible outcomes delivered through our services.

Discovery and Diagnostics: Faster identification of root-cause issues through structured synthesis of stakeholder input and system documentation

Knowledge Capture and Insights: Persistent access to decision trails and tribal knowledge, reducing dependency on individual memory or silos.

Innovation Engineering: Accelerated product ideation and validation by surfacing past learnings, user pain points, and technical constraints.

Legacy Re-Platforming: Reduced rework and risk through centralized visibility into architectural decisions and integration touchpoints.

ADAPT powers the delivery of Jeavio's core services, accelerating discovery, capturing institutional knowledge, guiding modernization, and driving insight-led innovation to protect and grow enterprise value.
